

The Governing Body of the High School for Girls

Strategic Objectives

Teachers, Support Staff and Governors will work together to create an inclusive and socially sensitive environment which will enable every individual that attends the school to maximise their learning potential, resulting in them maximising their achievement.

1. We will ensure that our students are enabled and empowered to be self-starting, lifelong learners who do not accept just being taught as the only way to achieve their goals.
2. We will attract and retain the highest quality teachers we can, and expect of them the highest quality lessons. We will not accept poor standards of teaching.
3. We will support the development of all staff, teaching and non- teaching, to ensure we have the best leadership at all levels in the school so that we challenge ourselves and strive to be better in all that we do.
4. We will ensure that the school maintains a good financial position, ensuring continuous investment in improving all of the resources and facilities that support our students' endeavours.
5. We will look outwards to the wider world and build local, national and international relationships to support our students in understanding and enacting their role as global citizens.
